

1

1. Galvanised finish W20 windows and doors add light, air and style to a South London showroom

2

2. Versatility of design is possible with the W20 range due to a large selection of available sections and steel's inherent strength. Used here as a contemporary internal partition wall

3

3. W20 dark grey polyester powder coated double glazed windows and doors used in a variety of styles on a North London conversion

4

4. W20 series galvanised and polyester powder coated double glazed windows with true steel glazing bars retain the aesthetic but increase thermal insulation in a London warehouse conversion project

5

5. W20 slim sightline galvanised and polyester powder coated double glazed steel windows add light to a new build development in North London
