

1

1. W40 replacement double glazed blast-resistant black powder steel windows in central London commercial building

2

2. Modern clean lines on W40 grey polyester powder coated doors on private dwelling reconstruction in North London

3

3. Complete design versatility is possible with W40 by way of its commercial grade steel wall thicknesses and extended suite of profiles

4. W40 replacement double glazed steel windows to major central London Grade II listed property

4

5

5. W40 windows and matching doors are ideal for extensions and reconstructions in buildings of architectural interest where small sightlines do not mean a compromise in performance, such as on this country manor house extension
